Data Producers and Data Users Working Together to Meet Regulatory Requirements

TCEQ MSW

Practical Quantitation Limits

- The Texas Commission on Environmental Quality (TCEQ) has implemented a program to study and verify the level at which analytical laboratories can meet the regulatory requirements for analytical data reporting at the quantitation level?
- Why?

30 Texas Administrative Code (30 TAC) Chapter (§330)

Historically...

- Reporting limits were defined at pre-set concentrations.
- > Lower Limit of Quantitation (LLOQ).

OWNER / OPERATOR

- 30 TAC §330 permitting process establishes that the MSWLF owner / operators are exclusively responsible for their GWM Program.
- Data deliverables must: satisfy rule requirements &
- be legally defensible and technically correct.
